

M.R.F. Supervisor's Monthly Report August 11th, 2012

The M.R.F. crew for the busy month of July accomplished the following tasks:

- Accepted incoming garbage
- Sorting recyclables
- Re-training the public
- Baling lots of recyclables
- Crushing glass
- Switching out the garbage and demo boxes
- Working on the haz-mat
- Sorting out scrap metal and aluminum
- Servicing the equipment
- Processing the old paint
- Cleaning up the grounds
- Working on the demo area
- Repairing the glass crusher
- Working on the electronics
- Mowing the landfill cap
- Dealing with D.N.R. questions
- Cleaning the shop
- Answering a lot of phone calls
- Our daily routine
- Oh and re-training the public

Additional info:

1. I will be sending out another load of recyclables this week. We still have not been paid for the last load. I met with Lloyd and told him the town should check into charging interest. His reaction was interesting to say the least. The price of aluminum is still pretty low. I believe and so does Lloyd that the price will go up in the fall. I'll plan moving a load then.
2. Carey is back from vacation now, so he and I will be moving recyclables pretty steady as I can arrange for pickups.

Respectfully Submitted,
Ted Pallas supervisor M.R.F.
