

## Madeline Island Ambulance Service Report

January 2012

Our new van style ambulance has had its self inspection approved by the Wisconsin DOT ambulance inspector and is now in service. All EMT's and drivers are going through an introduction of the new rig. We want to thank Deena Schuppe for getting this big project completed.

The old van style ambulance has been sold and transferred to its new owner.

During the month of January we have had one run that was a transport.

The new position descriptions that were approved by the Town Board have been filled by election at our last regular meeting. The officers are Deena Schuppe, acquisitions and equipment, Nick Nelson , personnel and training officer and Cynthia Dalzell , Administrative officer. We are waiting for town board approval before position description are signed the officers are official.

We are holding interviews for a driver and have four people that have applied for the position.

We will be holding CPR refresher on Feb. 4<sup>th</sup> for all EMTs, some police officers and the fire department. We have two EMT's attending the Arrowhead EMS conference in Duluth and three attending the conference in Milwaukee this month. These conferences are a fine way of refreshing our knowledge and learning new information valuable to our service.

Respectfully submitted:

Cynthia Dalzell

Madeline Island Ambulance Service
