

M.R.F. Supervisor's Monthly Report December 12th, 2011

The jobs done by Carey and I for the month of November at the M.R.F. include:

Accepting incoming trash and demo
Sorting recyclables
Crushing glass
Baling recyclables
Working on Haz-Mat
Sorting old paint
Processing scrap metal
Switching the garbage and demo boxes
Working on the demo area
Processing the incoming electronics
Repairing the glass crusher
Cleaning up the grounds
Working on the exchange
Cleaning the shop
Servicing the equipment
Answering numerous phone calls
Getting ready for the snow to fly
Plus our daily routine

Additional info:

1. With winter coming I will be setting up a schedule for AA Roll Off and the placement of our winter spare containers. I am sure the boats will be running well into January so no need to rush.
2. I have gone over the 2011 Schedule of Fees. I see no need to increase anything for this coming year.
3. Bob Germer D.N.R. Solid Waste and Recycling Materials Management Specialist came to the M.R.F. on November 16th, for our annual inspection. We received an excellent evaluation once again. Bob continues to be a great help to me with the interesting assortment of material collected here at the M.R.F.

Respectfully Submitted,

Ted Pallas Supervisor M.R.F.
