The AWOS project: Nelson Construction installed the access road and site prep with occasional interruptions from the weather and the Sand Island project for the Park Service. The civil sub-contractor was able get started mid-August and completed his work this past Sunday the 21st. The FAA is scheduled to turn on the system the 15th of September or so. DBT Transportation Services, **the contractor successor to Vaisala**, will be here a couple of days prior to install the instrumentation. It has been a long road but the end is in sight.
