
INTEROFFICE MEMORANDUM

TO: TOWN OF LA POINTE BOARD OF SUPERVISORS
FROM: MICHAEL DALZELL – AIRPORT MANAGER
SUBJECT: MONTHLY REPORT
DATE: 27 SEPTEMBER 2016
CC: TOWN OF LA POINTE CLERK

The AWOS project was commissioned by the FAA on August 14th. Nelson Construction still has some work expanding the turn-around area. They are working at the site today (9/27). There is still an issue regarding the range of the radio broadcast. FAA minimums are 25 miles at 10,000 ft. Both Dave Donkers and Dave Dalquist have reported to me that they don't pick up the AWOS broadcast until they are less than 15 miles from the airport. This needs to be remedied by the contractor.

Otherwise, the system is working as it should. You can listen to real time weather conditions by calling 715-747-5519.

Air traffic was good through the end of August and Labor Day weekend. Now that the weather is cooling off traffic has begun its annual drop off.

Respectfully,
