Fire Chiefs report  
10/8-11/11/14

11/5 911 system was down, dispatch informed to man the fire hall until system back up.

This month we had the "AVERY" CD150 M delivered to the island. This is our brand new John Deere powered trailer pump used to fill our tankers during and after a fire. We call it the Avery after Avery Woods who donated it to the fire department. The manufacturer sent a couple reps to teach us how to run it. It is amazingly uncomplicated as Red proved because he insisted to be the first kid on the block to turn the key and push the button. He thus proved to us all that anyone can use this fantastic machine....Thanks Red

Training this month was a search and rescue refresher. The troops trained on the rescue A.T.V. and stretcher trailer, finding and recovering patients from the woods.

We are closing in on choosing our scba brand. Were hoping to wrap things up in the next month and get the new packs ordered. We will keep everybody up to date.

Be safe Rick Reichkitzer
