

Fire chiefs report 7-24 thru 8-8-16

No calls

8/3 monthly training -after the recent storms and power line issues our monthly training appropriately was a power line safety refresher. The main point that always comes from this training is treat every power line issue as they are live wires and they can and will kill you. We had trouble with the public during these storms getting some people to actually believe that the the damaged power lines could be extremely dangerous. From here on out we will be taking licence plates numbers, taking pictures of violators, informing lapointe P.D. and tickets and fines will be issued. We are this to hopefully get people to take the danger seriously. If we warn people over and over again an they ignore the emergency service workers and up hurt or dead its the emergency services workers that will be held accountable.

Be Safe

Chief Reichkitzer

( stay away from damaged power lines )
