

Fire Chief's Report

August 2016

8/3. Training meeting

Due to the weather and power line issues we chose to have a power line safety training and refresher. We covered the basics of down PowerLine protocol and procedures. We also informed members of the department that when we have to close roads to monitor power line issues until the utility companies dismiss us we have the right to have lapointe P.D. issue tickets and warnings to anyone not following our discretion for life safety.

8/10 toned out for missing person at Town Park. Emergency services were called to search for middle aged male last seen 14:30. After conducting an organized search of the area until 2:30

8/11 I called off search until 6:00 a.m. at that time we were preparing for outside resources. Law enforcement went back to the town to check victims vehicle one more time and discovered individual had self-rescued.

Detailed report to come per permission of victim to disclose various details of situation.

Thanks Rick Reichkitzer
